

Satellite radio is the radio I wish to listen to. It provides the variety and quality I want. The NAB or any other entity should not be allowed to dictate what I listen to. This would be the equivalent of censorship. My freedom of speech should not be limited to politicians and broadcasters who feel they can dictate what will only be self serving and profitable to themselves and for no other reason. Our Country was not founded on the belief that money buys freedom, but rather on the belief that the people have a voice.
